

Supplemental Remarks/Arguments

Support for Added Limitations:

Amended claim 16 adds the limitation "having a substantially straight length between first and second opposite ends." No new matter has been added by this amendment. Rather, support for this limitation is found in the specification in the paragraphs beginning at page 4, line 9; page 5, line 10; page 5, line 19; and page 9, line 23 and in Figs. 3 and 10. In these paragraphs and Figs., the inductors 202, 244 and 246 are shown and described as having a length that is substantially straight between opposite ends 210 and 214.

For the reasons specifically discussed above, and others, it is believed that claims 16-27 define patentable subject matter. Reconsideration of the previous rejections as they might apply to these claims is therefore respectfully requested. Applicant respectfully requests that a timely Notice of Allowance be issued in this case.
